Quadrant 3: Reflective Processing (Meta-Cognitive) - Self-Monitoring
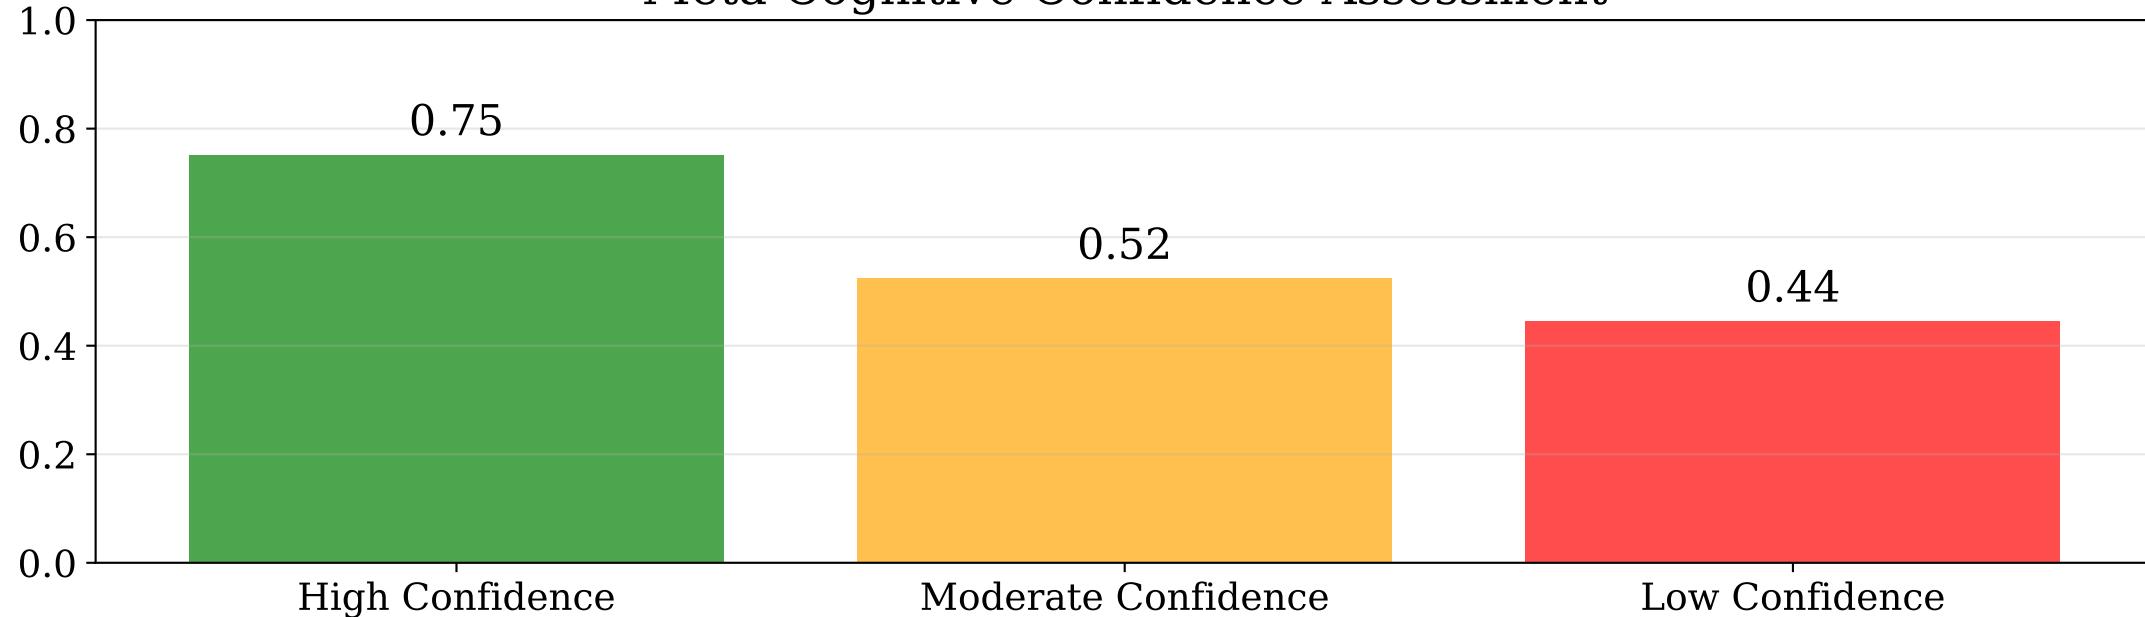

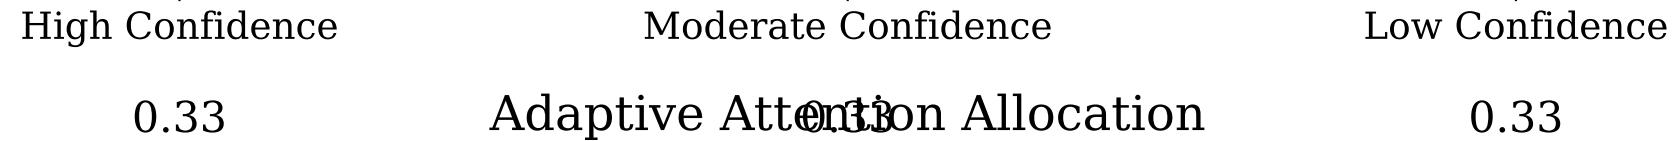

Meta-Cognitive Confidence Assessment

Confidence Score

- High Confidence: 0.75
- Moderate Confidence: 0.52
- Low Confidence: 0.44

Adaptive Attention Allocation

Attention Allocation (Monitoring)

- High Confidence: 0.33
- Moderate Confidence: 0.33
- Low Confidence: 0.33

Quadrant 3: Reflective processing enables meta-cognitive evaluation. The system assesses its own confidence in inferences and adaptively allocates attention resources based on self-assessment.
