¹ Nextflow 25.04.0 introduced data-lineage provenance tracking (build-level, not document-level). ² DVC provides content-addressed versioning for data artifacts via its object store. ³ DVC integrates with remote storage (S3, GCS, Azure) but does not natively orchestrate distributed compute. Overleaf and OpenAI Prism are collaborative cloud LaTeX/AI writing environments; their AI features (GPT-5.2 for Prism, Overleaf Labs AI for Overleaf) are partial/early-stage as of 2025–2026.
