

Abstract

Abstract I

This living record tracks $\{\{\text{EXP_TOTAL}\}\}$ experiments organized as a version-controlled tree with frozen nodes. Of these, $\{\{\text{EXP_ANSWERED}\}\}$ are answered ($\{\{\text{EXP_WINS}\}\}$ wins, $\{\{\text{EXP_DEAD_ENDS}\}\}$ dead ends), $\{\{\text{EXP_FROZEN}\}\}$ are frozen preregistrations, and $\{\{\text{EXP_PROVISIONAL}\}\}$ are provisional plans. The paper you are reading is generated from the tree state; answering or freezing a node regenerates it.
