

Appendix: Exemplar Project Summary I

Table 1: Canonical workspaces under projects/ illustrating heterogeneous domains while sharing Layer 1.

Project slug	Purpose	Highlights	Tests	Figures (Stage 02 hint)
template_code_project	Optimization tutorial	Convex demo figures, scripted tables	197 @ 90%+ gate	Controlled matplotlib exports
template_prose_project	Prose-heavy workflow	Validates narrative-only repos	76	Lightweight / optional plots
template_autoresearch_project	AutoResearch readiness	Planner + validation CLI	151	Readiness reports from Stage 02

Appendix: Exemplar Project Summary II

Meta manuscript location: introspective study lives in `projects/``templates/template_template/` beside the public exemplar set. Discovery now follows the typed `projects/` layout—`projects/templates/**` and `projects/active/**` are discovered/rendered, while `projects/working/**`, `projects/published/**`, `projects/archive/**`, and `projects/other/**` remain non-rendered—see root `CLAUDE.md` for invocation patterns (`resolve_project_root`).
